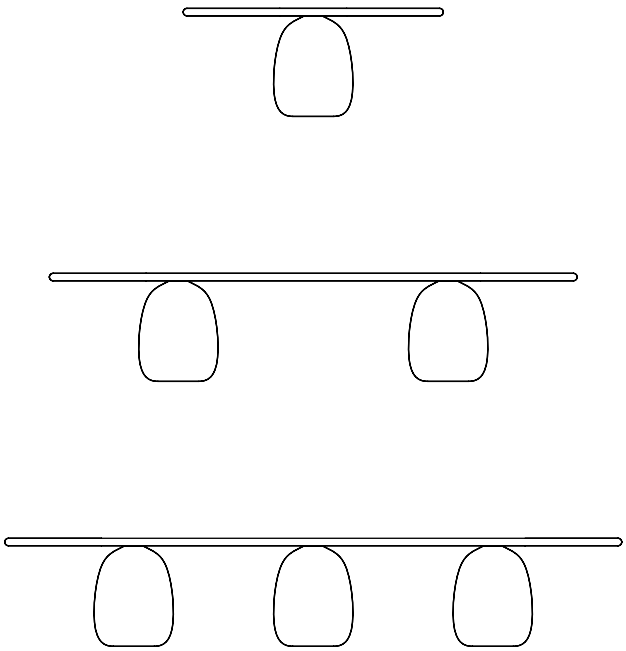
STACKLAB

Ash Collection | Dining Table



The Ash Dining Table is made exclusively from Ontario's diseased ash wood. Drawing from the collection's signature pedestal geometry, this table features a top shaped from joined ash wood boards, a design choice that diverts fallen trees from landfills and minimizes waste. In alignment with the collection's sustainability principles, all materials are sourced within an 300-mile radius of STACKLAB's Toronto studio and assembled locally, reflecting the brand's commitment to craftsmanship and a smaller environmental footprint.
