

An aerial photograph of a river delta, showing a central water channel that branches out into smaller channels and eventually empties into a larger body of water. The land is a mix of brown and tan, indicating different soil types or vegetation. The water is a deep blue, contrasting with the land. The overall scene is a complex network of water and land.

MC EWEN
FINISHES

GLASS

The glass used in McEwen shades is either kiln formed from flat glass stock, mold blown from glass bar, or cast. Please note that while some colors are listed in all 3 categories, they are not identical, and should not be confused. The raw glass used in each process is manufactured in different ways. As a result, glass shades of the same color name from these different processes differ slightly in color, density and texture. We feel they are compatible, and harmonious, when combined in the same fixture, as in Radial, model 1220, or when different fixtures with glass from the different processes are used in the same setting. As all of our glass shades are fabricated by hand, there may be subtle variations from piece to piece. This is a natural result of a handmade process.

METALS

McEwen uses copper, brass and steel in its fixtures. Small hardware is made of brass. Our Deep brown oxide, Deep black oxide and Japanese finishes are applied by hand to copper, brass and steel. Subtle differences in the finishes of these various metals will be evident; this is normal. All steel parts are sealed with a matte lacquer; all copper & brass parts are sealed with wax. Although durable, improper cleaning will damage the finish. Because patinization is an organic process, the patina finishes on your fixture will continue to develop over time. This is normal. Our satin nickel finish is an electrolytic plating process and is applied only to copper & brass. To assure years of beauty please follow the cleaning instructions below. If you have any questions please do not hesitate to call our office.

FLAT & KILN FORMED GLASS (KFG):

CL	Clear
OW	Opal white (<i>variegated</i>)
PG	Pale gold
SD	Sand
SO	Seeded opal white

MOLD BLOWN GLASS (MBG):

OW	Opal white
HB	Helbeige
QS	Quicksilver
WS	Woodsmoke

CAST GLASS (CG):

CL	Clear
OW	Opal white
PG	Pale gold
BZ	Bronze

METAL (PATINA AND NATURAL)

BL	Deep black oxide
BR	Deep brown oxide
NB	Natural brass
JP	Japanesque (<i>variegated brown oxide; only available on Gear & Momo</i>).

METAL (ANODIZED, PLATED & POWDER COATED)

SN	Satin nickel
EW	Enamel white (<i>Momo only</i>).
BA	Deep bronze anodized (<i>Prism & Wing only</i>).
SA	Silver anodized (<i>Prism & Wing only</i>).

REFLECTORS (VELLUM ONLY)

Gold Reflectors (Vellum)
Silver Reflectors (Vellum)

OTHER

Czech glass beads / SS Wirecloth (Glimmer)
Mica Discs (Barrel & House)
